

Actionable DeFi Intelligence Layer

Capital follows verified alpha

The Problem

Where do traders find edge today?

Paid alpha groups in Discord, Telegram, forums

Opaque, unverifiable, often manipulated signal streams

Manual copy trading has poor UX, poor record keeping, and zero automation

No public score or proof of alpha for most influencers

The Solution

SIGNAL is programmable alpha infrastructure.

Verified forecasts by top-ranked signal creators

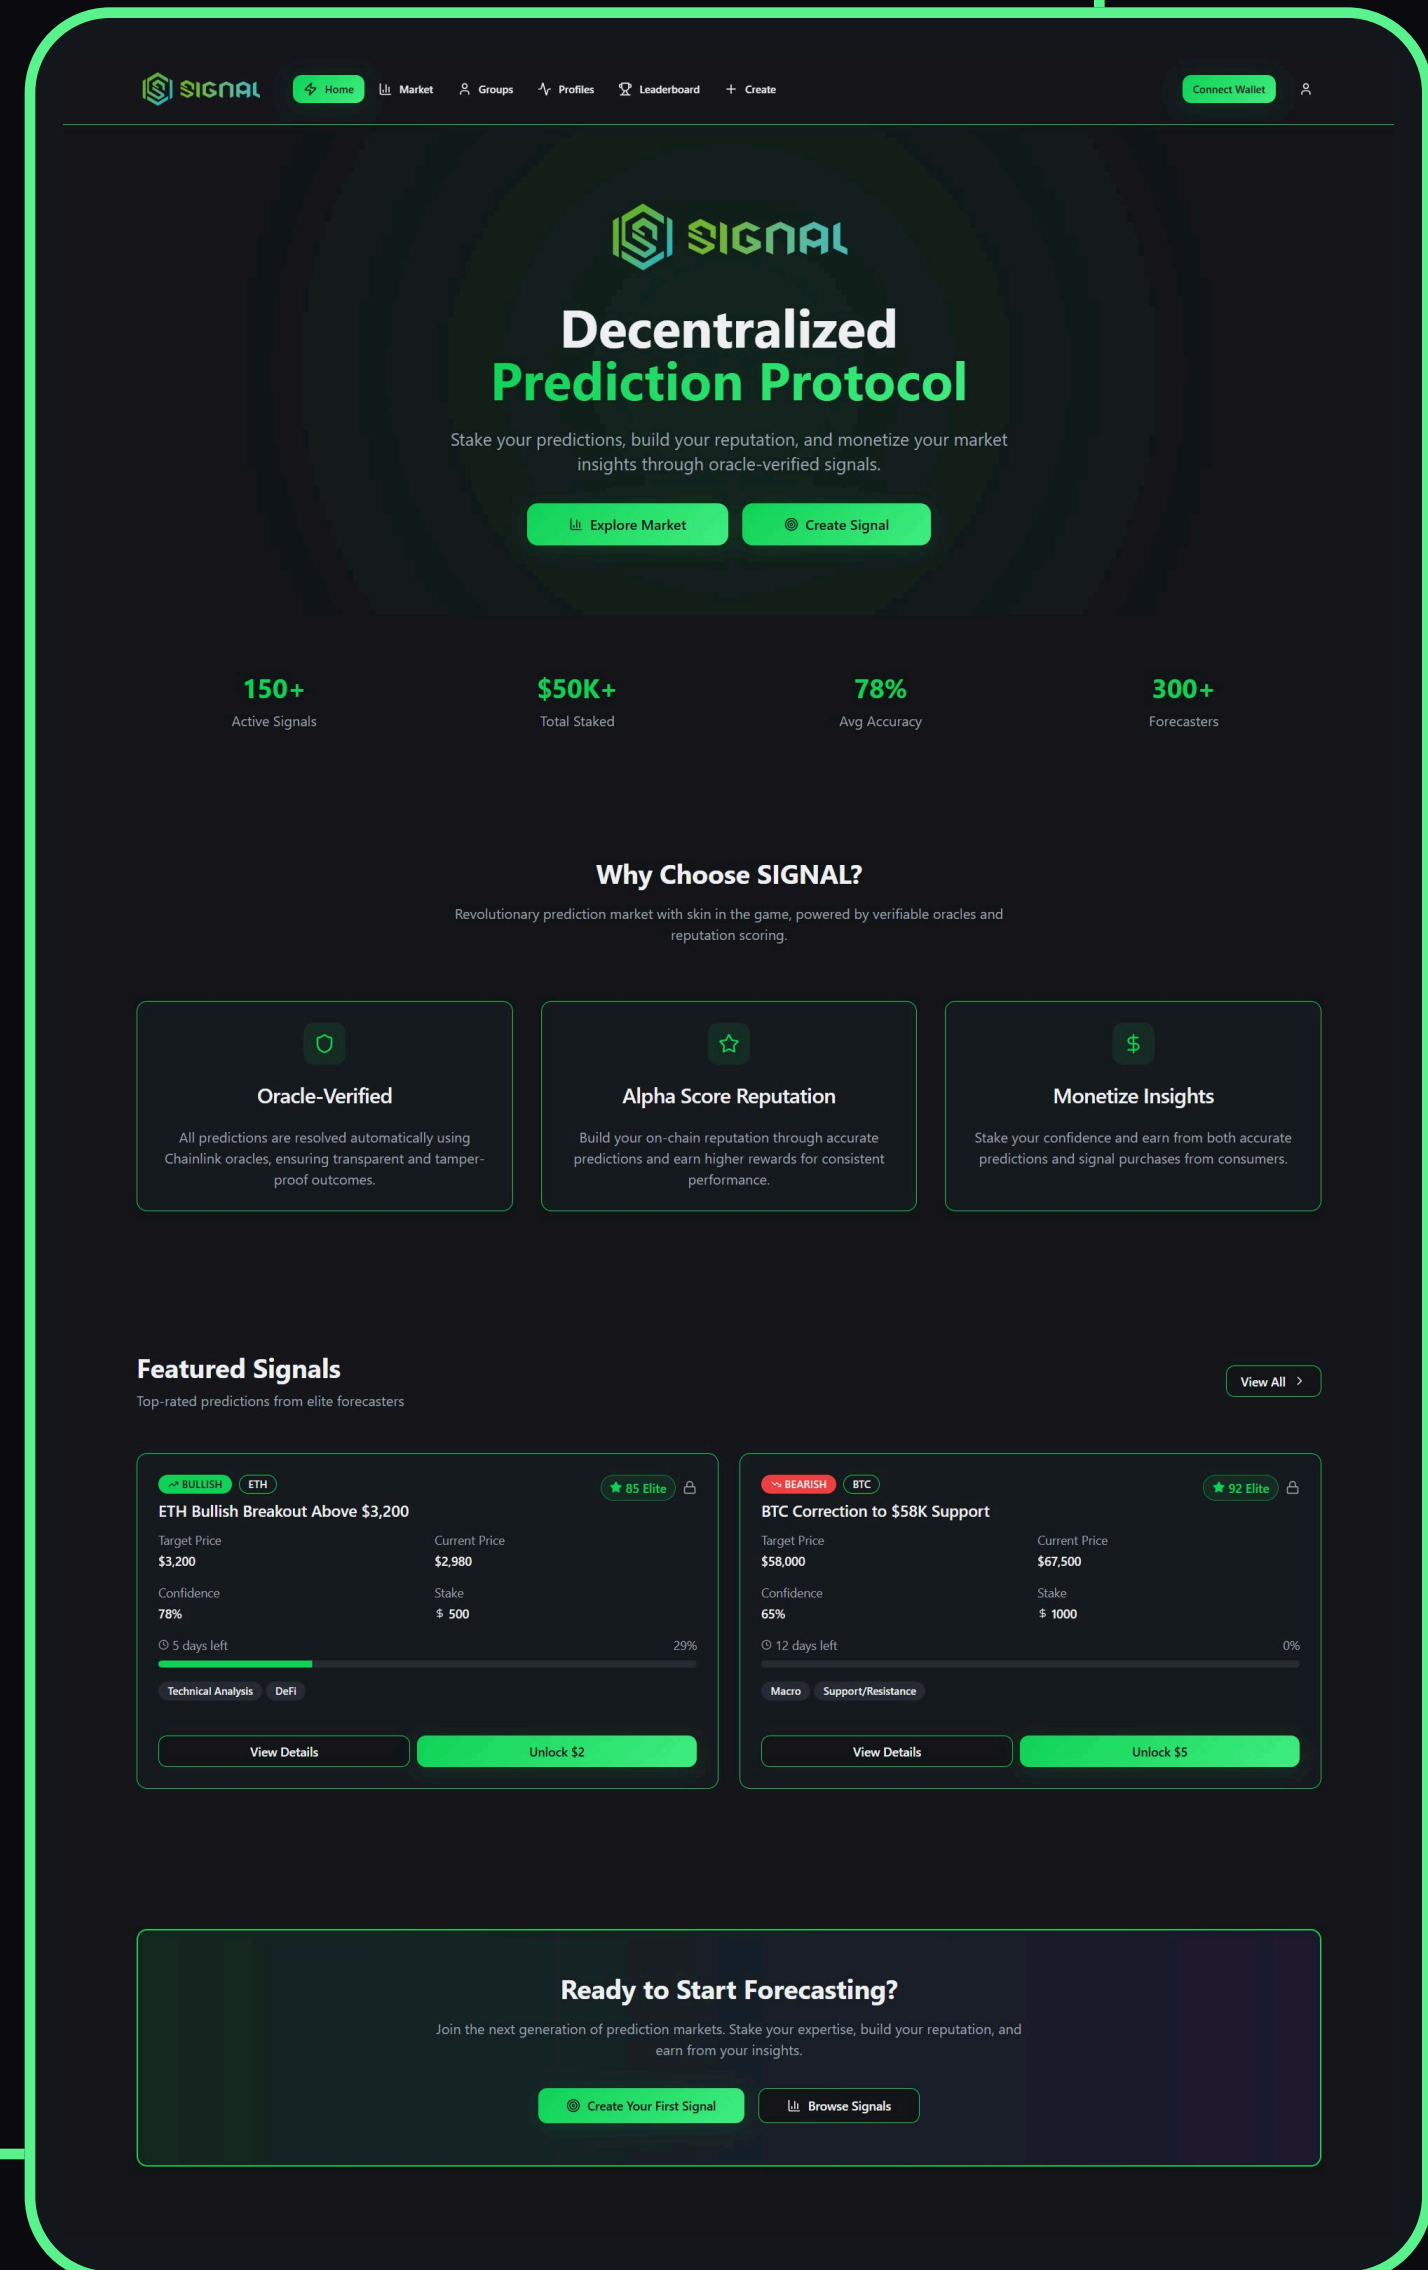

Time-locked, staked, oracle-secured predictions

Unlockable, auto-executable signal vaults

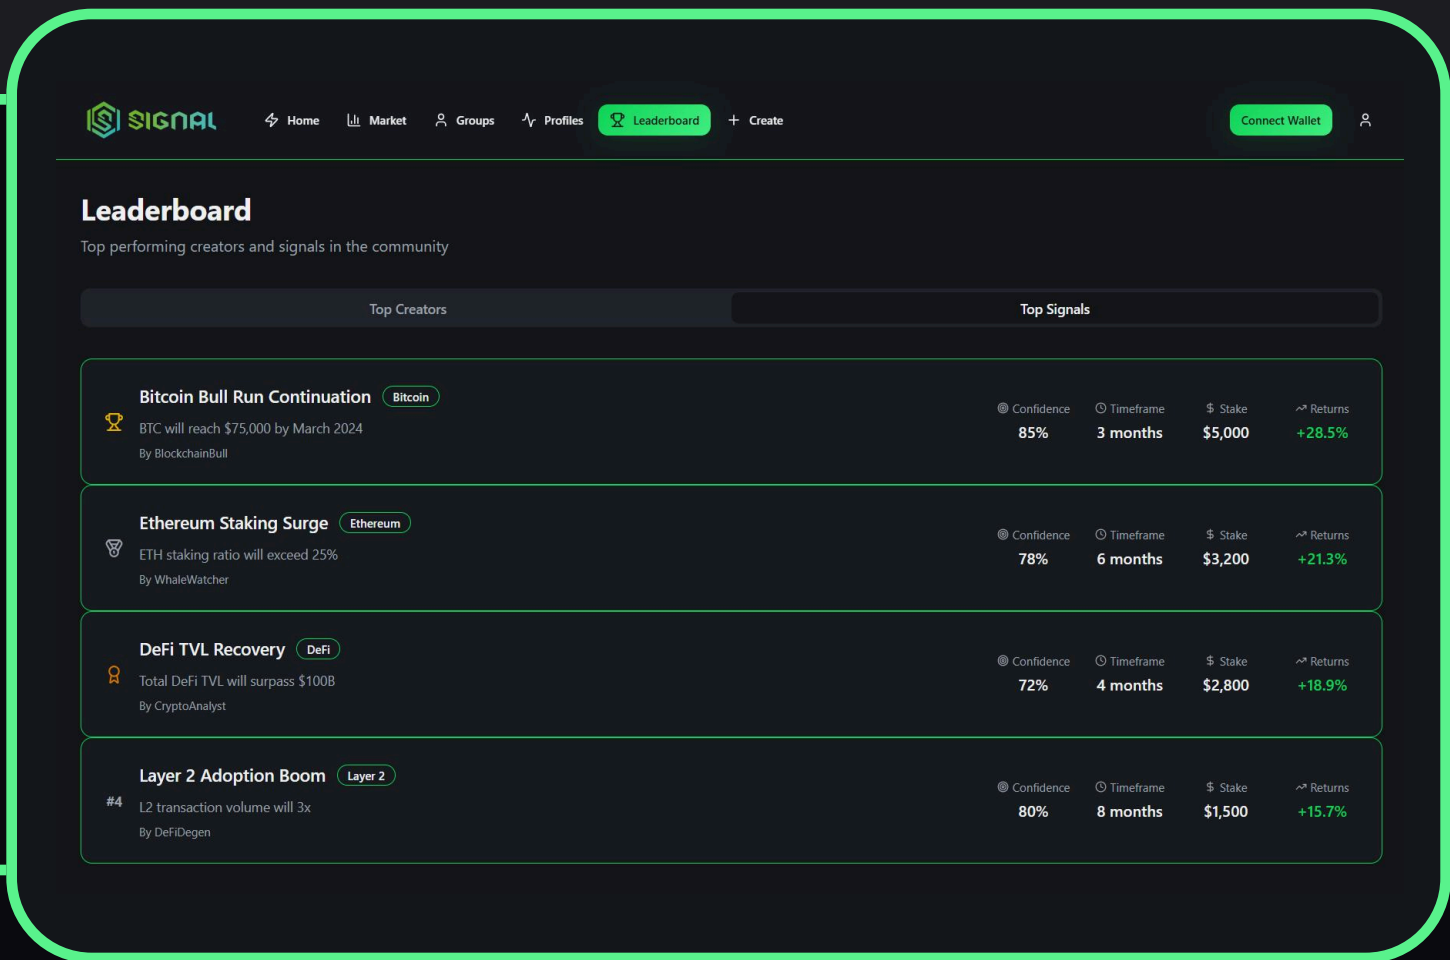

Reputation layer (AlphaScore) for long-term credibility

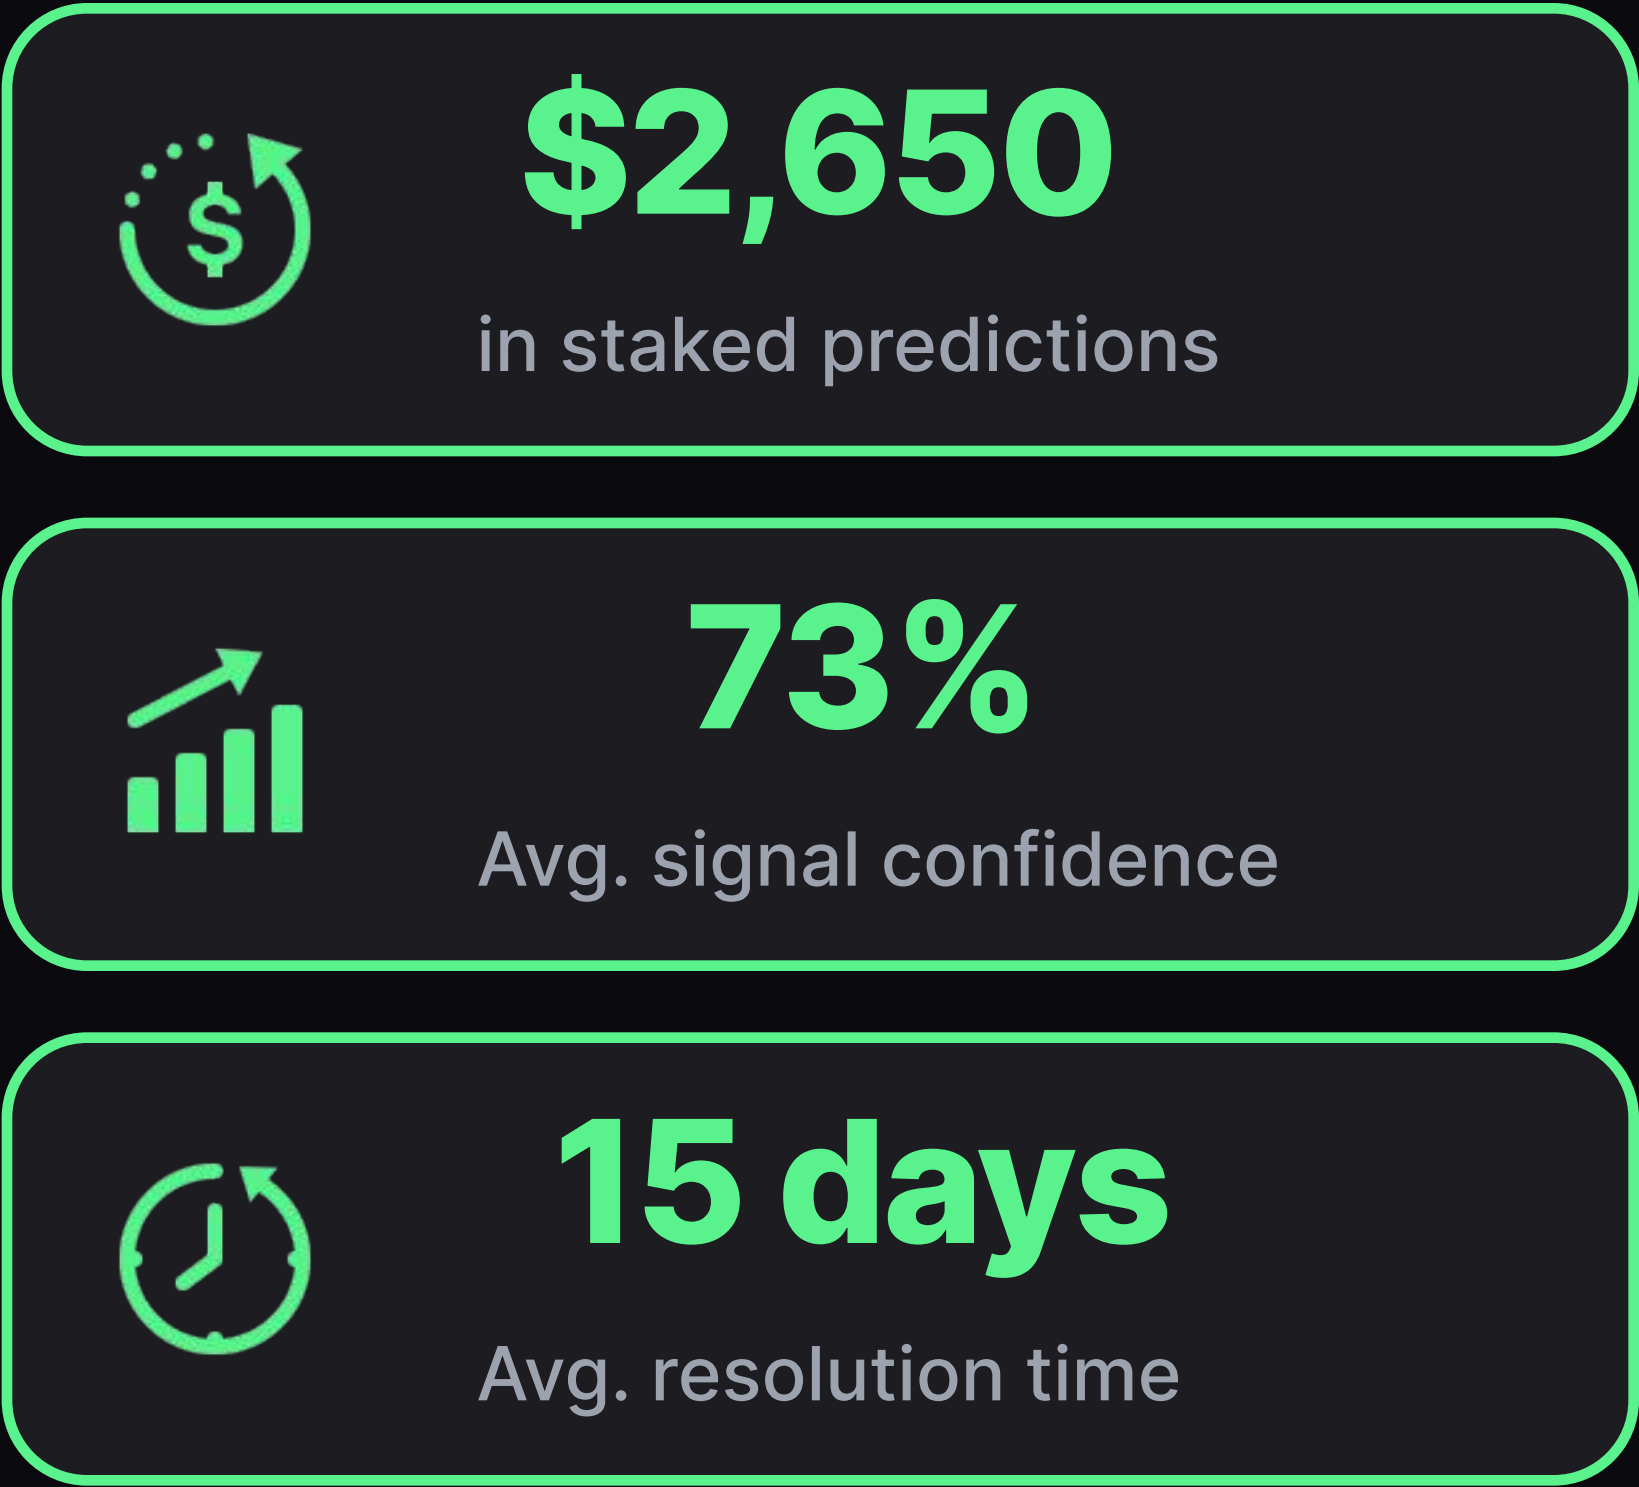

Phase 1 Traction

- Forecast Marketplace MVP live on testnet
- Forecasts across Crypto, Macro, and RWA
- AlphaScore scoring engine launched
- 100+ early creators onboarded

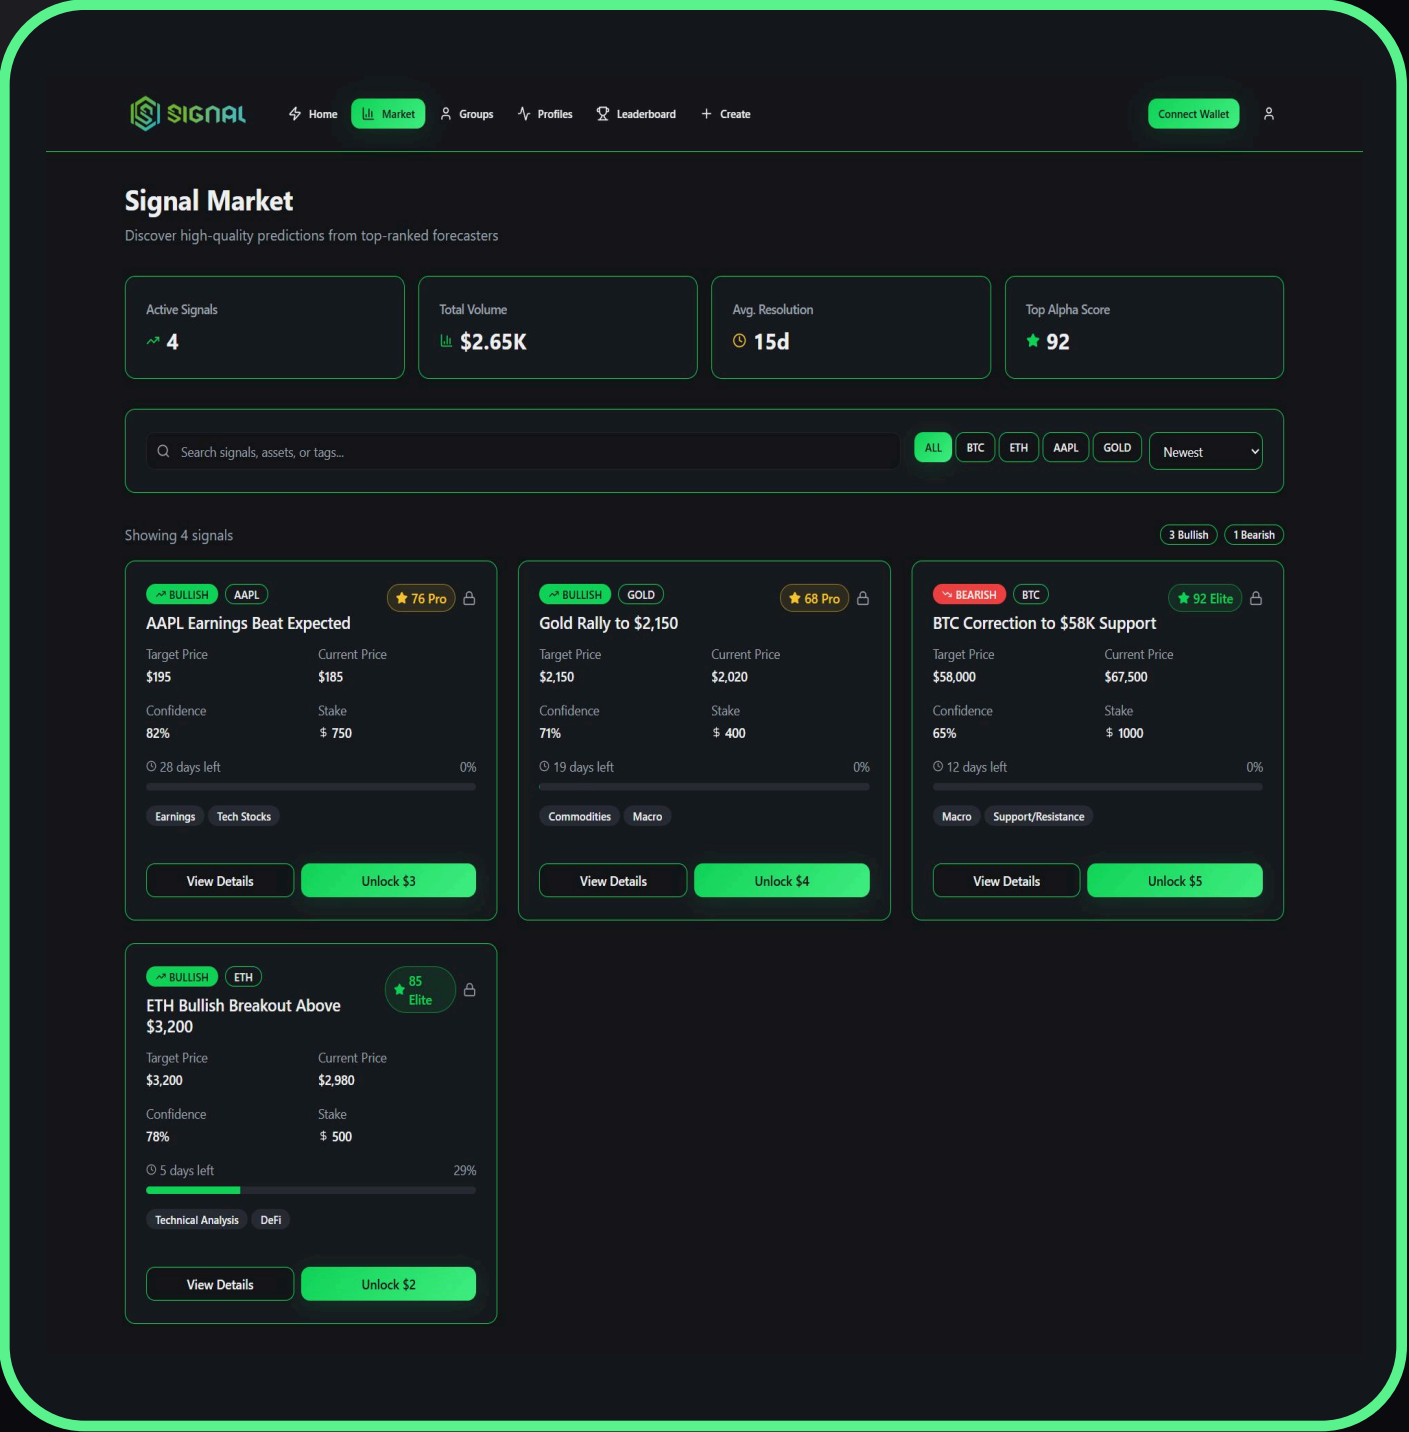

Metrics:

Phase 2: On-Chain Execution

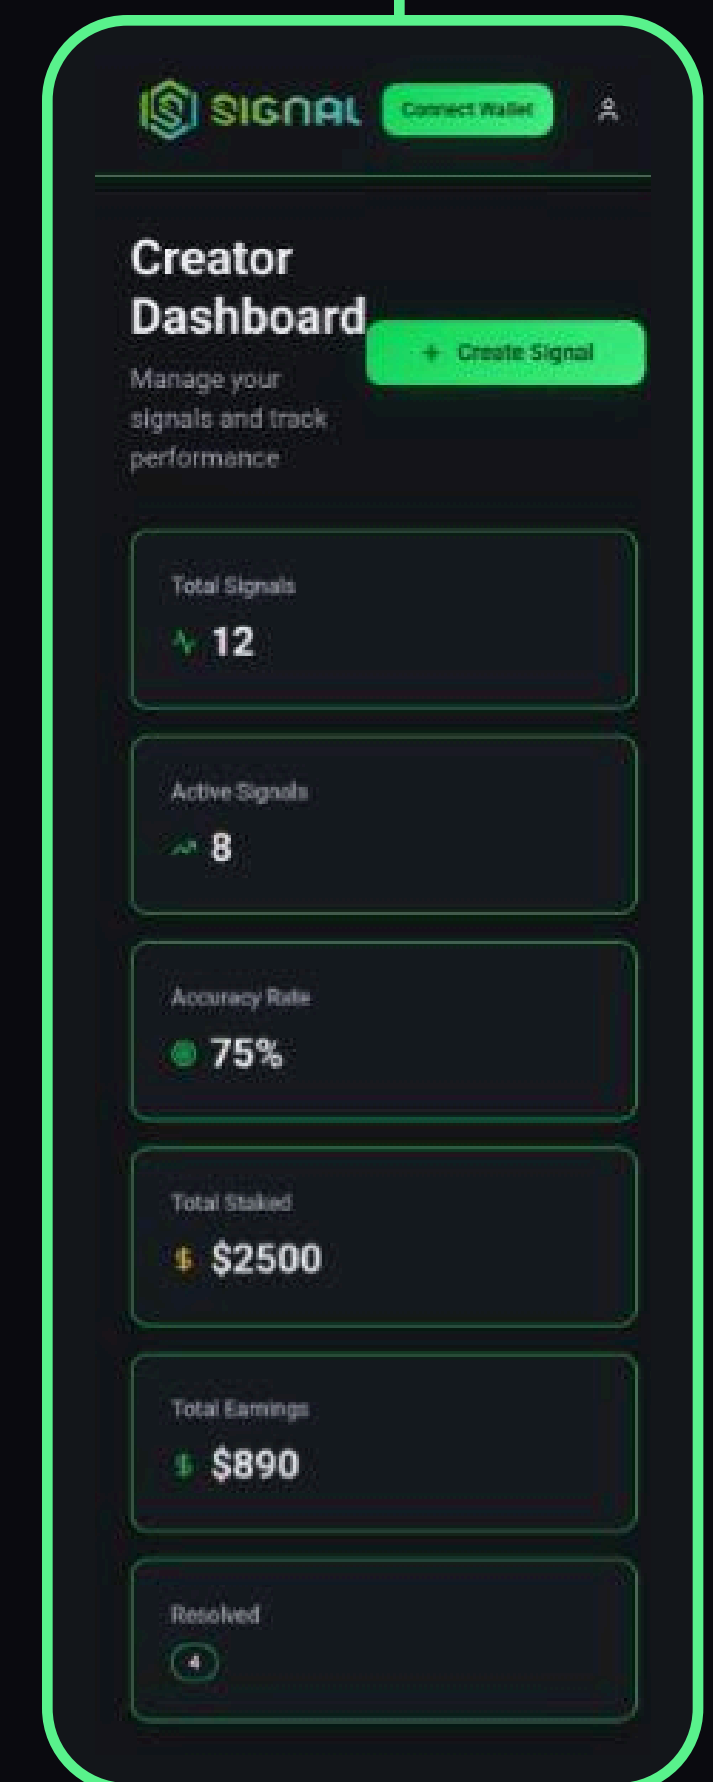

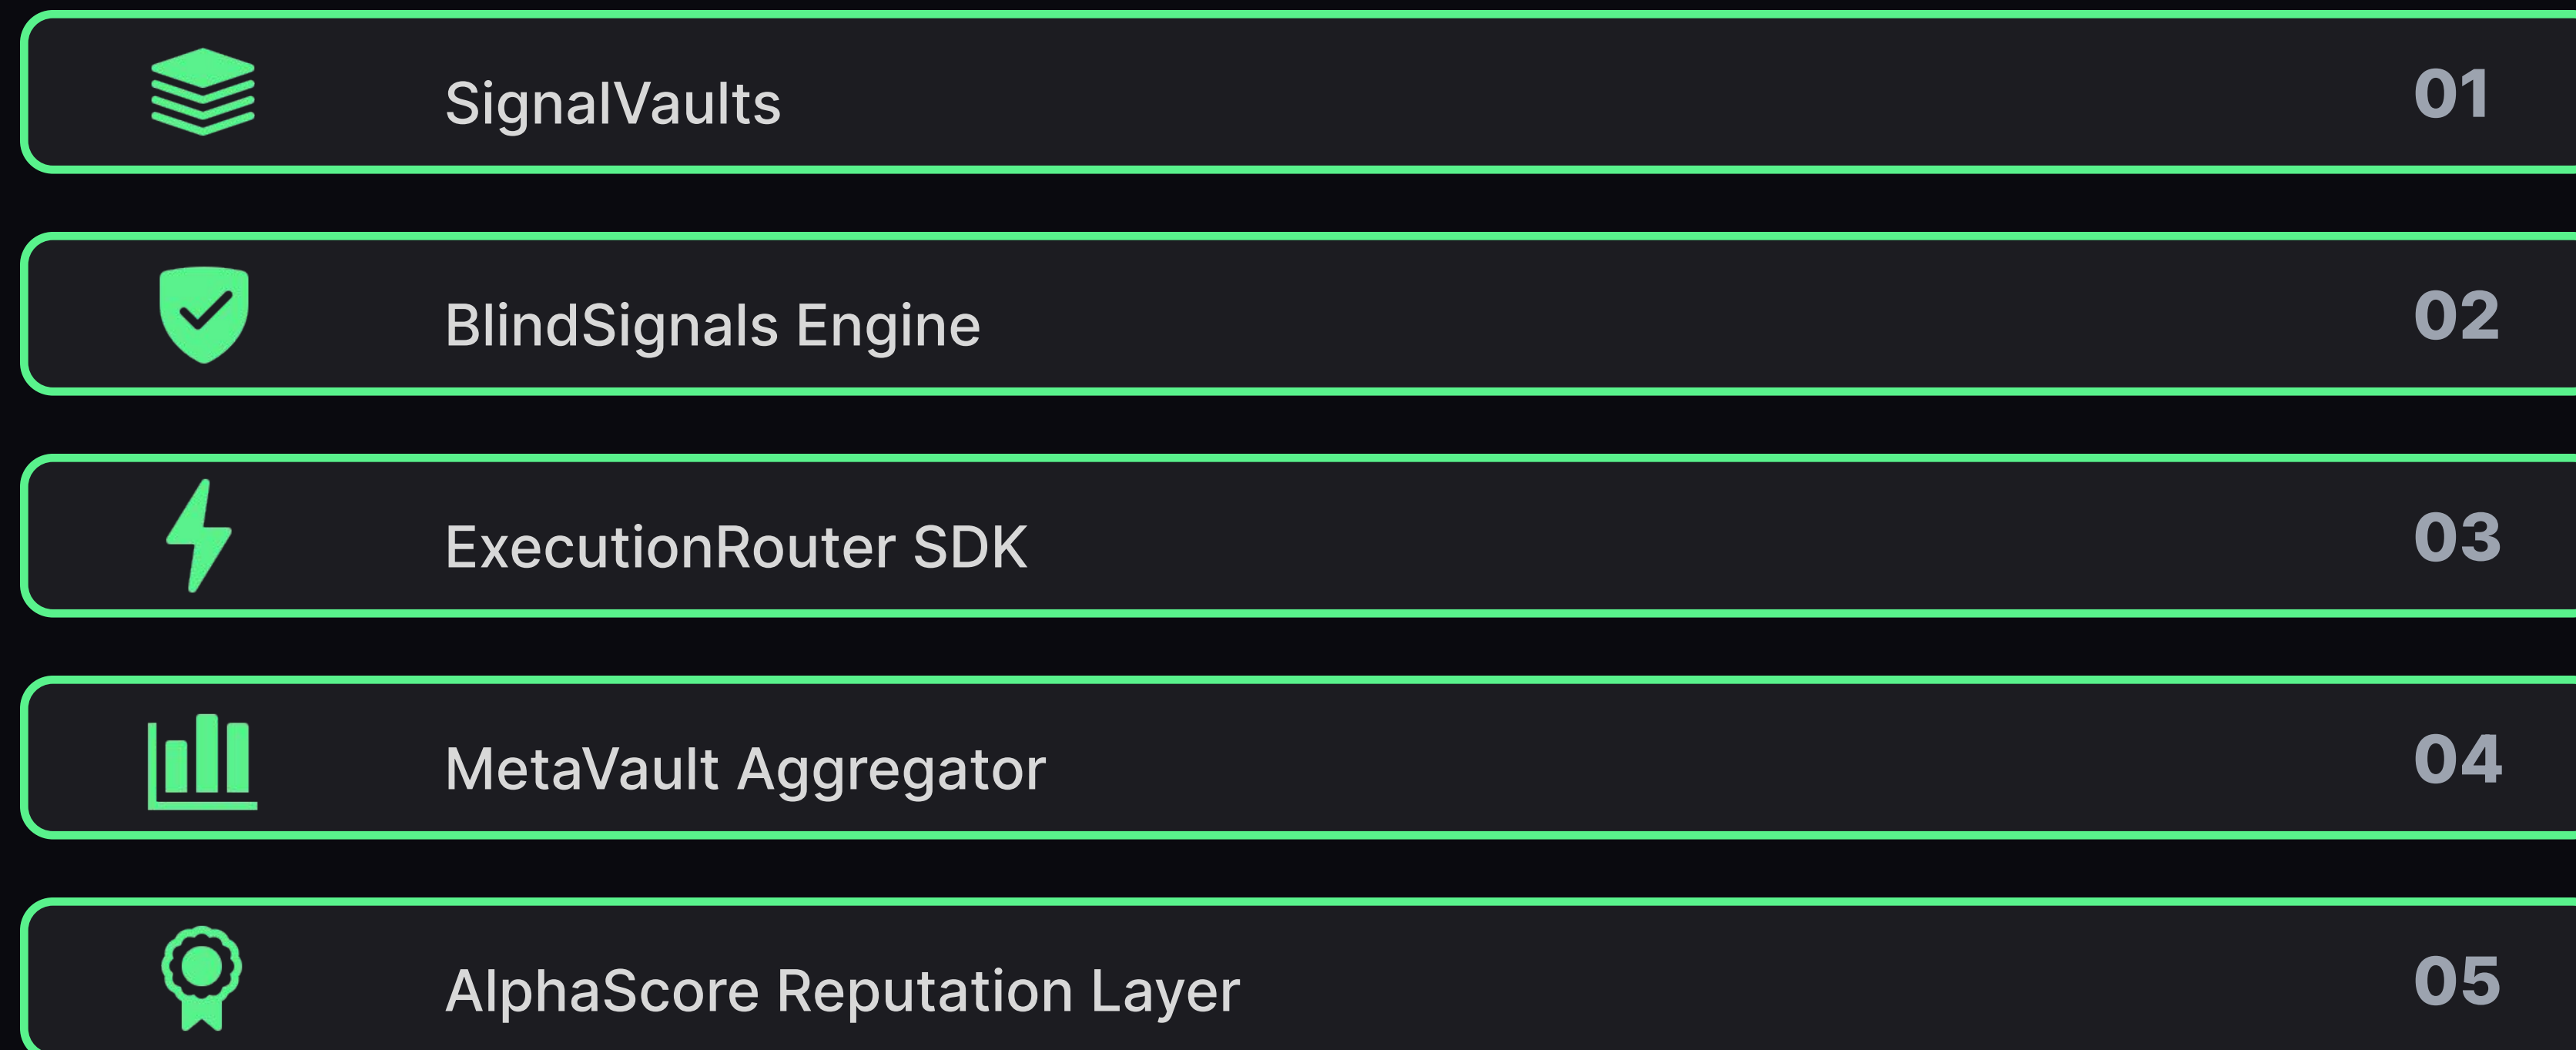

From Signals to Smart Contract Vaults

- Users allocate capital to trusted forecast vaults
- BlindSignals prevent frontrunning or market rigging
- ExecutionRouter automates portfolio actions
- MetaVaults: composable strategies across creators

Signal Summary

Asset	Direction	Target	Stake
—	↗ BULLISH	↖	↖

Important Notes:

- Your stake will be locked until signal resolution
- Resolution occurs automatically via oracle at expiry
- Incorrect predictions may result in stake slashing
- Users pay 2 USDC to unlock this signal

📌 Submit Signal

The \$300k Raise

Goal

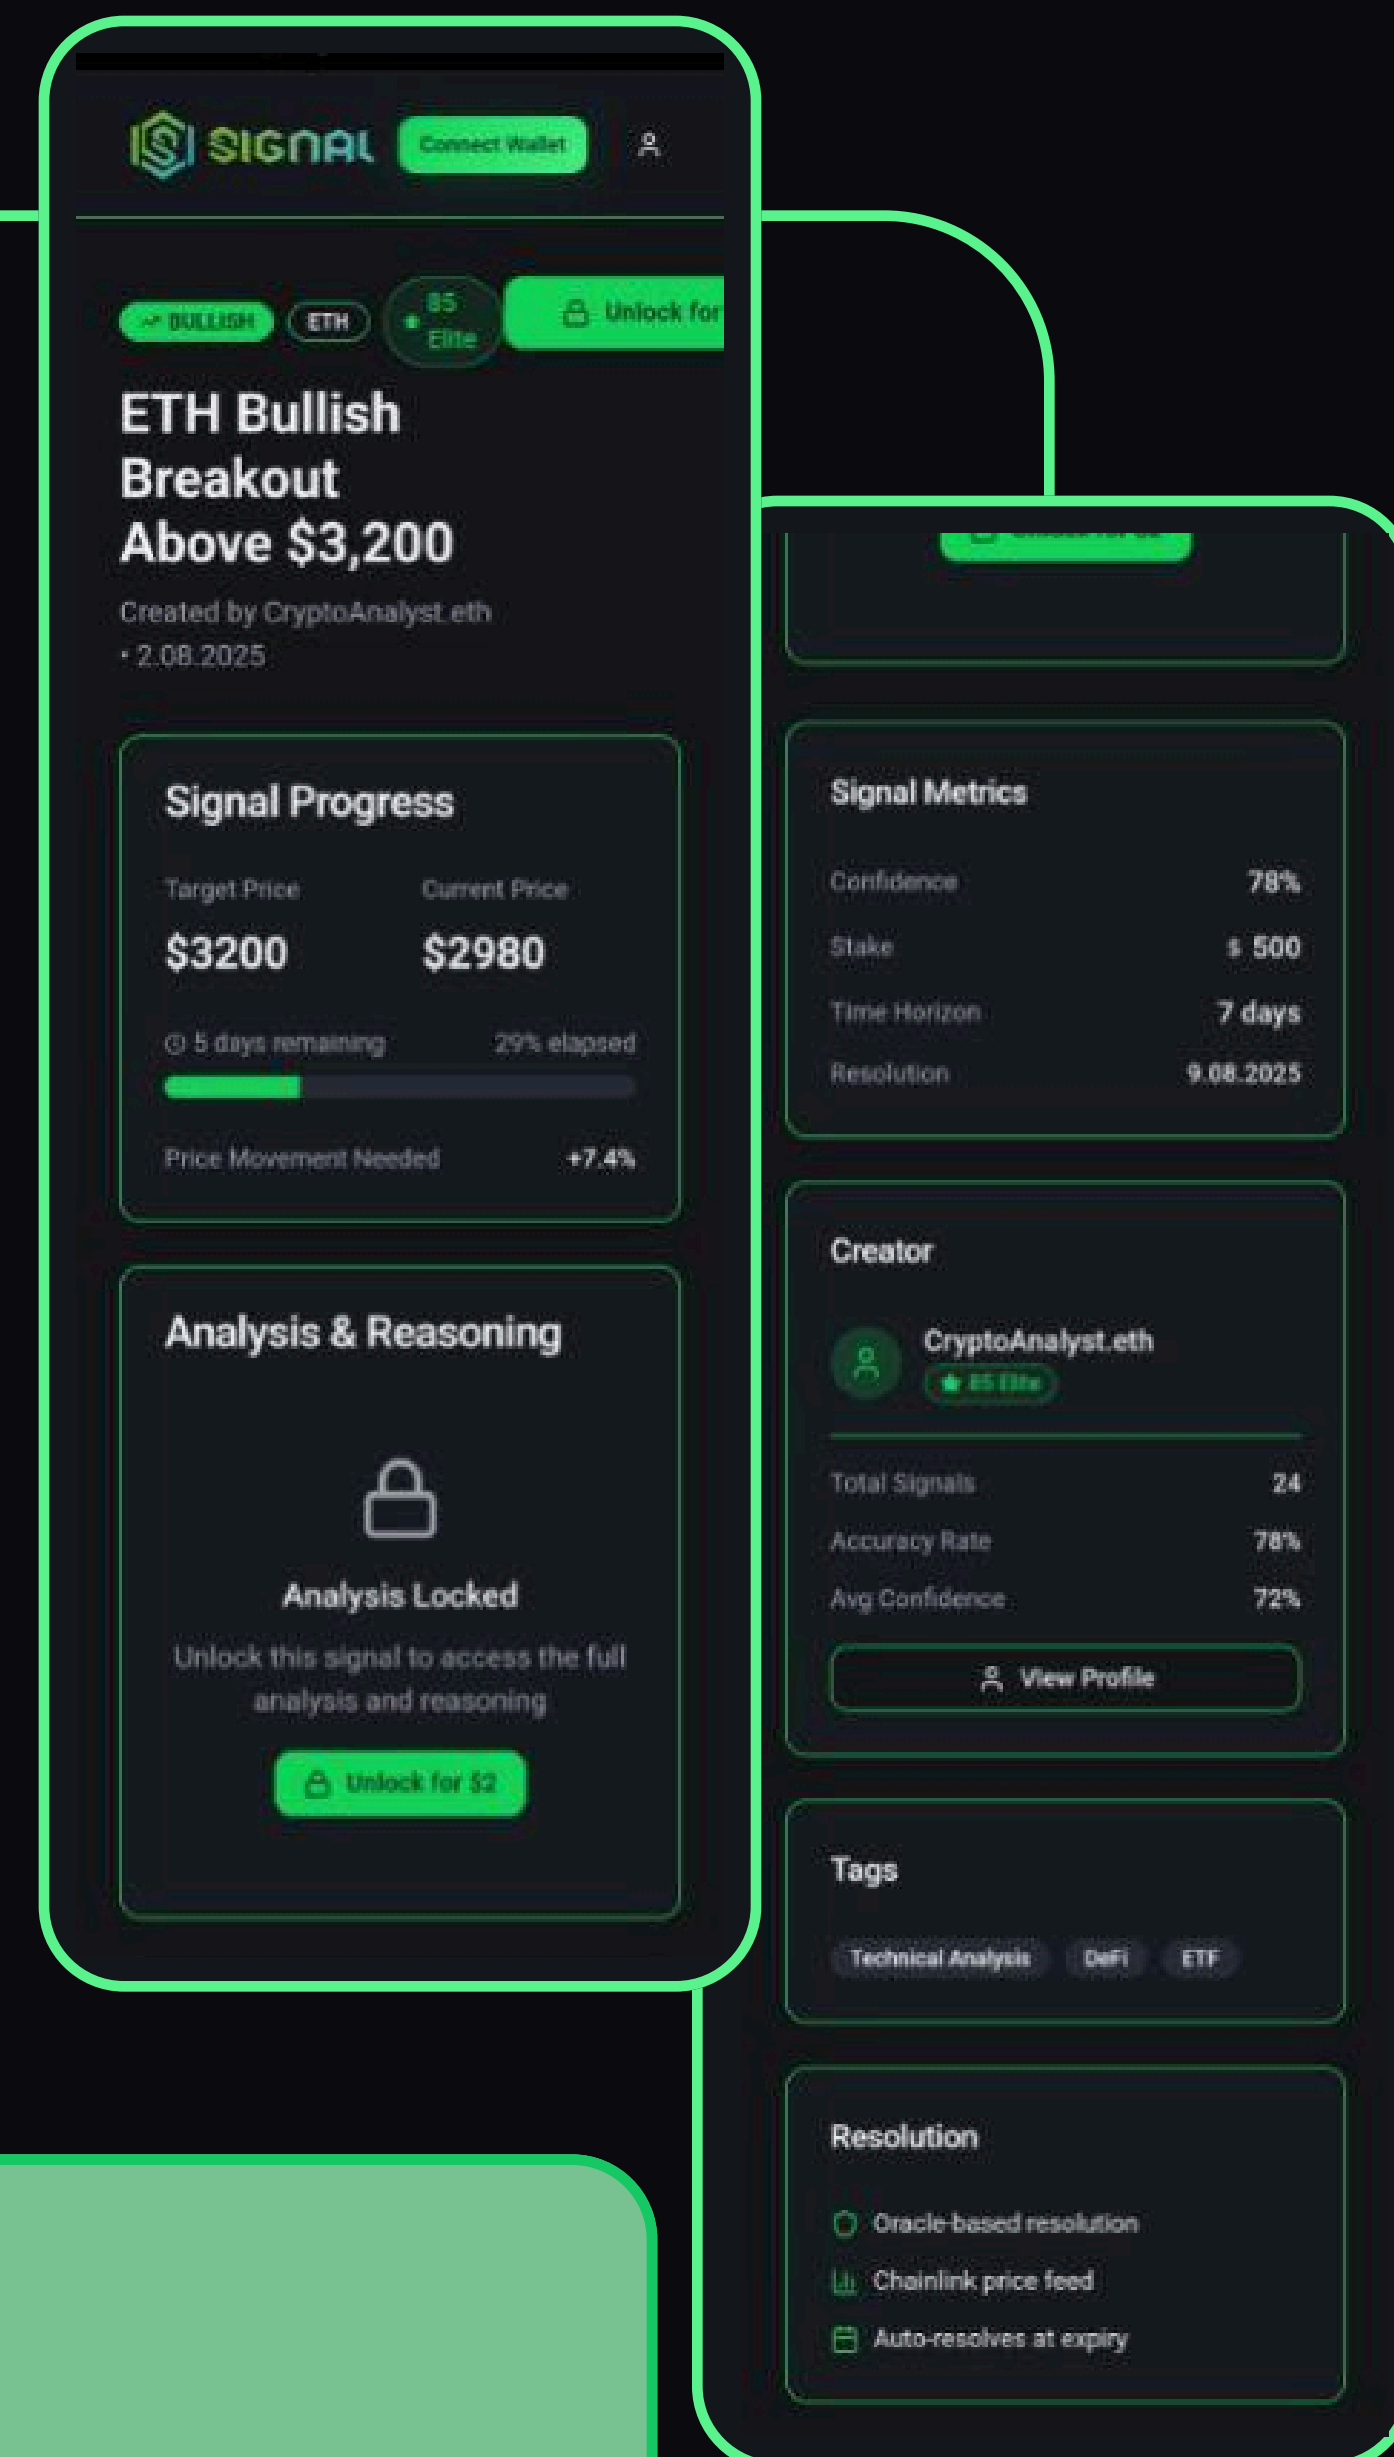

Build SignalVaults, BlindSignals, Execution Router (Q3–Q4 2025)

- Dev team + smart contract audits
- Creator acquisition & incentive program
- Early MetaVault pilot launch

Next Step:

\$3M–\$5M

milestone-based follow-on raise or bootstrap with performance-based revenue
